Serial No.: 10/658,241

5677-177

IN THE CLAIMS

This listing of claims replaces all prior listings of claims in this application.

1. (currently amended) A process for preparing a mixture of a bis (5, 7, 3', 4'-tetra-O-protected)

epicatechin (4β,8)₂-trimer and other oligomers a tris (5, 7, 3', 4'-tetra-O-protected) epicatechin (4β,8)₂-

trimer comprises the step of coupling a 5,7,3',4'-tetra-O-protected epicatechin monomer with a 5,7,3',4'-

tetra-O-protected-4-acyloxy-epicatechin monomer in the presence of an acidic clay.

2. (currently amended) A process for preparing a mixture of of 5, 7, 3', 4' tetra O protected

epicatechin (4β, 8) oligomers tris (5, 7, 3', 4'-tetra-O-protected) epicatechin (4β, 8)₂ -trimer and tetrakis

(5, 7, 3', 4'-tetra-O-protected) epicatechin (4β, 8)₃-tetramer comprises the step of coupling a bis (5, 7, 3',

4'-terta-O-protected) epicatechin (4β, 8)-dimer with a 5,7,3',4'-tetra-O-protected-4-acyloxy epicatechin

monomer in the presence of an acidic clay.

3. (currently amended) The process of Claim 1 or 2, wherein the acidic clay is a mortmorillonite

Montmorillonite clay.

4. (currently amended) The process of Claim 1, wherein the protecting groups on the protected

monomers are protecting groups which do not deactivate the A ring of the protected monomers.

(currently amended) The process of Claim 2, wherein the protecting groups on the protected

oligomer dimer are protecting groups that do not deactivate the A ring of the upper mer of the oligomer

dimer and the protecting groups on the protected monomer are protecting groups that do not deactivate

that the A ring of the monomer.

2 of 11

5.

Serial No.: 10/658,241

5677-177

6. (currently amended) The process of Claim 4 or 5, wherein the protecting groups are benzyl

groups.

(currently amended) The process of Claim 1 or 2, wherein the 4-acyloxy group is a C_2 - C_6 alkoxy 7.

group having a terminal hydroxyl hydroxy group.

8. (currently amended) The process of Claim 7, wherein the C2-C6 alkoxy group having the terminal

hydroxyl hydroxy group is a 2-hydroxyethoxy group.

9. (originally presented) The process of Claim 1, wherein the protected monomers are 5,7,3',4'-tetra-

O-benzyl-epicatechin and 5,7,3',4'-tetra-O-benzyl-4-[2-hydroxyethoxy]-epicatechin; wherein the mixture

comprises the benzyl-protected epicatechin (4β, 8)-dimer and benzyl-protected epicatechin (4β, 8)₂ trimer.

10. (currently amended) The process of Claim 9, wherein the benzyl protected 5, 7, 3', 4'-tetra-O-

<u>benzyl-epicatechin-(4 β ,8)-dimer is the major product in the mixture.</u>

11. (currently amended) The process of Claim 2, wherein the oligomer is a benzyl protected (4β, 8)-

dimer is bis (5, 7, 3', 4'-tetra-O-benzyl) epicatechin (4β,8)-dimer; and wherein the monomer is

5,7,3',4'-tetra-O-benzyl-4-[2-hydroxyethoxy] epicatechin; and wherein the mixture comprises a benzyl

protected epicatechin (4β, 8) dimer, a [(4β, 8)]₂ benzyl protected epicatechin trimer, and a benzyl-

protected epicatechin (4β, 8)₂-tetramer bis (5, 7, 3', 4'-tetra-O-benzyl) epicatechin (4β,8)-dimer, tris (5, 7,

3', 4'-tetra-O-benzyl) epicatechin (4β,8)₂-trimer, and tetrakis (5, 7, 3', 4'-tetra-O-benzyl) epicatechin

 $(4\beta,8)_3$ -tetramer.

3 of 11

Serial No.: 10/658,241

5677-177

(currently amended) The process of Claim 1, further comprising the step of separating the 12.

protected monomer(s), protected dimer, and other and/or protected oligomers trimer from the monomer

by column chromatography.

(currently amended) The process of Claim 2, further comprising the step of separating the 13.

protected oligomers and protected monomer monomer(s), protected dimer, protected trimer, and protected

tetramer by column chromatography.

(currently amended) The process of Claim 12 or 13, further comprising the step of replacing the 14.

protecting groups on the separated dimers dimer, and/or oligomers trimer, and/or tetramer with hydrogen.

(currently amended) A process for preparing a mixture of benzyl-protected (4β, 8)-oligomers of 15.

epicatechin or catechin comprises reacting a 5, 7, 3', 4'-tetra-O-benzyl-protected-epicatechin or -catechin

monomer or a 5, 7, 3', 4'-tetra-O-benzyl-protected_(4β,8)-epicatechin or catechin or catechin oligomer

and with 3-O-acetyl-4-[(2-benzothiazolyl)thio]-5, 7, 3', 4'-tetra-O-benzyl-epicatechin in the presence of

silver tetrafluoroborate.

(currently amended) A process for preparing a mixture of acetyl-protected and benzyl-protected 16.

(4β,8)-oligomers of epicatchin or catechin comprises reacting a 3-O-acetyl-5,7,3',4'-tetra-O-

benzylepicatechin monomer or a 3-O-acetyl-5,7,3',4'-tetra-O-benzylepicatechin (4β,8)-oligomer and 3-O-

acetyl-4-[(2-benzothiazolyl)thio]-5,7,3',4'-tetra-O-benzylepicatechin in of silver the presence

tetrafluoroborate.a 3-O acetyl-5,7,3',4'-tetra-O benzylepicatechin-monomer or a 3-O acetyl-5,7,3',4'-tetra-

O-benzylepicatechin (4β,8) oligomer and with 3-O-acetyl-4-[(2-benzothiazolyl)thio]-5,7,3',4'-tetra-O-

benzyl-epicatechin in the presence of silver tetrafluoroborate.

4 of 11

Serial No.: 10/658,241

5677-177

(amended) The process of Claim 15 or 16, wherein oligomers are 5, 7, 3', 4'-tetra-O-benzyl-17.

protected (48,8) epicatechin-oliogomers, and wherein the silver tetrafluoroborate is dried before the

reaction.

(originally presented) The process of Claim 17, wherein the drying is vacuum drying carried out 18.

immediately before the reaction.

(amended) The process of Claim 16, wherein the mixture comprises protected trimer trimers 19.

through protected octamers. heptamer when the protected oligomer is the dimer, protected tetramer

through the protected octamer when the protected oligomer is the trimer, and the protected pentamer

through the protected undecamer when the protected oligomer is the tetramer.

(amended) The process of Claim 15 or 16, further comprising the step of isolating the protected 20.

oligomers in the mixture by reverse phase high pressure liquid chromatography.

(originally presented) The process of Claim 20, further comprising the step of removing the 21.

acetyl-protecting group(s) from the isolated oligomers.

(currently amended) The process of Claim 21, wherein the acetyl-protecting group(s) removal is 22.

carried out are removed with aqueous tetra-n-butyl ammonium hydroxide.

(originally presented) The process of Claim 20, further comprising the step of removing the 23.

benzyl-protecting groups from the isolated oligomers.

5 of 11

Serial No.: 10/658,241

5677-177

(currently amended) The process of Claim 23, wherein the benzyl-protecting groups removal is 24.

carried out are removed by hydrogenolysis.

(currently amended) The process of Claim 20, further comprising the steps of removing the acetyl 25.

protecting group(s) groups and then removing the benzyl protecting groups from the isolated oligomers.

(currently amended) The process of Claim 25, wherein the acetyl protecting group(s) removal is 26.

earried out are removed with aqueous tetra-n-butyl ammonium hydroxide and wherein the benzyl-

protecting groups removal is carried out are removed by hydrogenolysis.

(currently amended) A process for preparing a mixture of 5,7,3',4'-tetra-O-benzyl-epicatechin-27.

 $(4\beta,8)$ -oligomers comprises the steps of:

(a) activating with 2 (benzothiazolyl)thio groups the C 4 positions of each of epicatechin the C-4

position of 5,7,3',4'-tetra-O-benzyl-epicatechin with a 2-(benzothiazolyl)thio group to form 4-[(2-

benzothiazolyl)thio]-5, 7, 3', 4'-tetra-O-benzylepicatechin; and

(b) self_condensing the activated, protected monomers the 4-[(2-benothiazolyl)thio]-5,7,3',4'-

tetra-O-benzylepicatechin in the presence of silver tetrafluoroborate or an acidic clay to form a benzyl-

protected condensed epicatechin (4B,8) oligomer the mixture of 5,7,3',4' tetra O benzylepicatechin

(4β,8) oligomers.

28. (currently amended) The process of Claim 27, further comprising the steps of separating the

protected dimer, trimer, and tetramer oligomers and removing the benzyl protecting groups.

6 of 11

Serial No.: 10/658,241

5677-177

(currently amended) A process for chain extending a protected epicatechin (4β,8) oligomers 29.

oligomer with a C-4 activated, protected epicatechin $(4\beta,8)$ oligomer comprises the step of condensing an

epicatechin (4β,8)-oligomer having 3-O-acetyl-acetyl protecting groups at the 3-positions of all mers, and

5, 7, 3', 4' tetra O-benzyl protecting groups on at the 5, 7, 3' and 4' positions of all mers, and having a C-

4-[2(benzothiazolyl)thio] C-4-[2-(benzothiazolyl)thio] activating group on a terminal mer with an

epicatechin oligomer having 3-O-acetylacetyl protecting groups at the 3-positions of each mer and

5.7.3'.4' tetra O benzyl benzyl protecting groups at the 5, 7, 3' and 4' positions on of each mer in the

presence of silver tetrafluoroborate or an acidic clay.

(originally presented currently amended) The process of Claim 29, wherein one of the C-4 30.

activated, protected oligomers is a 3-O-acetyl-5,7,3',4'-tetra-O-benzylepicatechin (4β,8)-[3-O-acetyl-4-

[(2-benzothiozolyl)thio-5,7,3',4'-tetra-O-benyzlopicatechin]3-O-acetyl-5,7,3',4'-tetra-O-benzyl-

epicatechin-(4β,8)-3-O-acetyl-4-[(2-benzothiazolyl)thio-5,7,3',4'-tetra-O-benzyl-epicatechin; wherein the

benzyl-protected oligomer is tetrakis (3-O-acetyl-5,7,3',4'-tetra-O-benzyl)epicatechin (4β,8)₃-

tetramertetrakis (3 O acetyl-5,7,3',4'-tetra O-benzyl)epicatechin (4β,8)₃-tetramer[[,]]; wherein the

protected, chain-extended oligomer is hexakis (3-O acetyl-5,7,3',4' tetra-O benzyl tetramer epicatechin)

(4β,8)_s-hexamerhexakis (3-O-acetyl-5,7,3',4'-tetra-O-benzyl)epicatechin (4β,8)_s-hexamer.

4-[(2-Benothiazolyl)thio]-5,7,3',4'-tetra-O-benzylepicatechin4-[(2-31. (originally presented)

Benothiazolyl)thio]-5,7,3',4'-tetra-O-benzyl-epicatechin or 4-[(2-benzothiazolyl)thio]-5,7,3',4'-tetra-O-benzyl-epicatechin

benzylcatechin 4-[(2-benzothiazolyl)thio]- 5,7,3',4'-tetra-O-benzyl-catechin.

(currently amended) A process for preparing the compound 4-[(2-benzothiazolyl)thio]-5,7,3',4'-32.

tetra-O-benzyl-epicatechin of Claim 31 comprises reacting 5,7,3',4'-tetra-O-benzyl-4-(2-hydroxyethoxy)-

Serial No.: 10/658,241

5677-177

epicatechin or 5,7,3',4' tetra O benzyl 4 (2 hydroxyethoxy)catechinwith an organoaluminum thiolate

generated from 2-mercaptobenzothiazole.

(originally presented) 4-[(2-Benzothiazolyl)thio]-3-O-acetyl-5,7,3',4'-tetra-O-benzyl-epicatechin 33.

or 4-[(2-benzothiazolyl)thio]-3-O-acetyl-5,7,3',4'-tetra-O-benzyl-catechin.

(currently amended) A process for preparing the compound4-[(2-benzothiazolyl)thio]-3-O-acetyl-34.

5,7,3',4'-tetra-O-benzyl-epicatechin of Claim 33 comprises reacting 5,7,3',4'-tetra-O-benzyl-4-(2-

-5,7,3',4'-tetra-O-benzyl-4-(2-hydroxylethoxy)catechin hydroxyethoxy)-epicatechin

organoaluminum thiolate generated from 2-mercaptobenzothiazole followed by acetylation.

35. (currently amended) A process for preparing a (4β,8)-dimer comprises the step of reacting

4-(benzylthio) catechin (4-(benzylthio) epicatechin or 4-(benzylthio)catechin with epicatechin or catechin

in the presence of silver tetrafluoroborate or dimethyl (methylthio) sulfonium tetrafluoroborate.

(originally presented) 4-(Benzythio)epicatechin-4-(Benzylthio)epicatechin or 36.

4-(benzylthio)catechin.

(originally presented) A process for preparing the compound of Claim 36 comprises reacting 37.

epicatechin or catechin with benzyl merception.

38. (originally presented) A method of treating breast cancer in a mammal in need of such treatment,

which treatment inhibits cancer cell growth through cell cycle arrest in the Go/G phase and comprises

8 of 11

Serial No.: 10/658,241

5677-177

administering to the mammal epicatechin-(4β,8)4-pentamer, wherein the breast cancer cells are selected

from the group consisting of human breast cancer cell lines MCF-7, SKBR-3, MDA 435, and MDA MB-

231.

(originally presented) The method of Claim 38, wherein the pentamer is a purified procyanidin 39.

fraction isolated from cocoa beans as a cocoa extract.

(originally presented) The method of Claim 39, wherein the pentamer is a synthetically prepared 40.

procyanidin.

(originally presented) The method of Claim 39, wherein the breast cancer cells are from the MDA 41.

MB-231 cell line.
